

# HUMIDUR<sup>®</sup> FP & HUMIDUR<sup>®</sup> CHAR APPLICATOR TRAINING

Matrix Composites & Engineering is pleased to offer Humidur<sup>®</sup> training courses designed specifically for applicators.

- **Humidur<sup>®</sup> FP Brush Application course (1 day).** Provides industrial painters with instruction on the unique properties of Humidur<sup>®</sup> FP products, surface preparation and practical experience of applying Humidur<sup>®</sup> FP with a brush or roller.
- **Humidur<sup>®</sup> FP Spray Application course (1 day).** Designed to teach spray painters how to spray Humidur FP correctly, and provides attendees with an introduction to airless plural pump setup and operation.
- **Humidur<sup>®</sup> Char PFP Trowel course (1 day).** This course introduces participants to the epoxy intumescent passive fire protection coating, Humidur<sup>®</sup> Char and how to apply utilising the trowel method.
- **Humidur<sup>®</sup> Char PFP Extrusion & Trowel course (2 days).** Designed for those wanting to learn how to apply Humidur<sup>®</sup> Char utilising both the extrusion and trowel method.
- **Humidur<sup>®</sup> Char PFP Spray Application course (3 days).** Designed to train and qualify applicators on the application Humidur<sup>®</sup> Char utilising an airless plural pump spray system.

A certificate of completion will be issued upon the passing of theoretical and practical assessments.
