

MATRIX COMPOSITES & ENGINEERING APPOINTS NMS AS EXCLUSIVE DISTRIBUTOR IN INDONESIA

HENDERSON, WA – 11 NOVEMBER 2025

Matrix Composites & Engineering is proud to announce the signing of an exclusive distribution agreement with PT Nurman Mitra Sentosa (NMS), a long-established and trusted supplier to Indonesia's oil and gas and geothermal sectors.

Under the agreement, NMS will represent Matrix's MAX-R™ low friction centralizer range across Indonesia, providing local customers with access to high-performance composite solutions designed for extended reach and complex wellbore operations. With a strong reputation for reliability and delivery, NMS brings decades of experience working with Pertamina, Indonesia's national energy operator, and a deep understanding of the local market.

"NMS is a highly respected partner in Indonesia's energy sector," said Aaron Begley, CEO of Matrix Composites & Engineering. "Their proven track record, technical capability, and established relationships make them an ideal partner to support Matrix's growth in Southeast Asia. We're excited to work together to deliver innovative well construction solutions to Indonesian operators."

The agreement includes exclusive distribution rights for Matrix's centralizer products, with support for marketing, logistics, and customer engagement across the region. Matrix will supply products under CIF Jakarta terms, with NMS managing importation and delivery to end users.

This partnership marks another milestone in Matrix's strategy to expand its global reach through trusted regional alliances.
